PROSPECTUS 2023

AT- STATION ROAD KHAIRMA JAMUI, BIHAR

MOB NO - 8789259370, 9955341523, 8227012706, 9608609514

VISION & MISSION

JAMUI POLYTECHNIC JAMUI

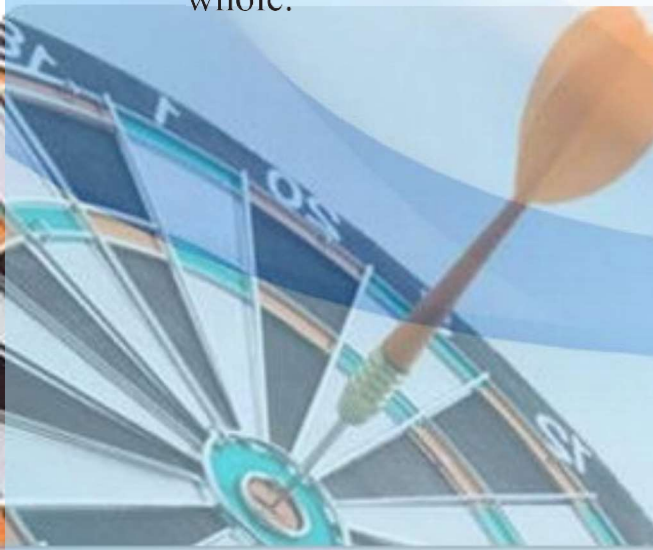

Our Vision

"To be a world class organization leading in technical and socioeconomic development of the country by ensuring high quality technical education to all sections of the society."

Our Mission

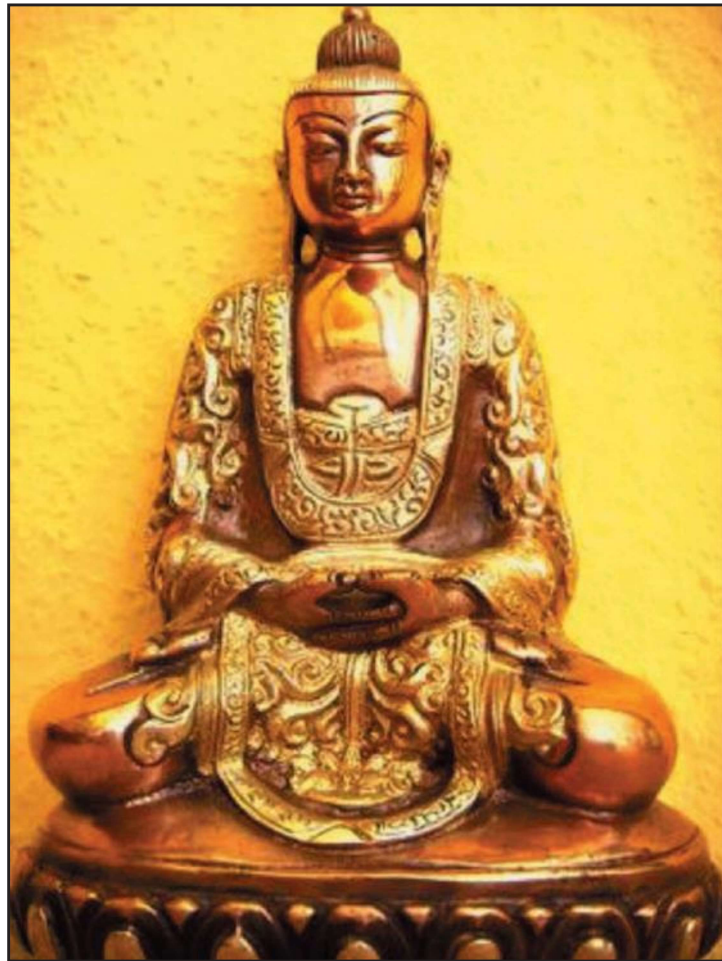

Technical Education plays a vital role in human resource development of the country by creating skilled manpower, enhancing industrial productivity and improving the quality of life.

- To create a bridge between skilled workers and design engineers in any industry.
- To face the challenges of the new millennium boldly.
- To meet the needs of society at large.
- To provide value added quality based technical education.
- To impart scientific knowledge base to develop need based technology.
- To generate self employment base and job potential for the rural development.
- To enhance the rate of social, economical and cultural development of the nation on the whole.

By taking technical education to doorstep of rural masses which results in all around development of rural area through the human resource development and knowledge, ultimately help in raise their standard of living and overall development of the Society, State & Nation.

Jai Hind

Ask not, what your country has done for you
ask, what you have done for your country

Success is never ending & failure is never final

The Size Of Our Problems Is Nothing As Compared To
Our Ability To Solve Them
We Mostly Over-estimate Our Problems
And Under-estimate Our Ability To Solve Them

Er. Ravishankar Prasad Singh
Director (Independent)
Engineers India Limited
Ministry of Petroleum and Natural Gas
Govt. of India

From the chairman's Desk

The continuous upgrading of facilities has brought our institute to the forefront of the educational scenario in the State of BIHAR. The world has moved into a new century and a new millennium. A developing country like India has to keep pace with the changes that are occurring within the rest of the world. Predicting the future is difficult for anyone. But two strongly emerging trends can be perceived.

Firstly, the demands on the technological front are going to intensify. Secondly, the process of the world which has become a Global Village will gather momentum.

In view of the above anticipation, the importance of higher education in building a nation is beyond anyone's doubt. The growth of a country on all fronts – agricultural, scientific, and industrial – is directly proportional to the creation of a well-trained professional work force. This can only be achieved through good quality higher education. This is exactly our motto at JAMUI POLYTECHNIC – **“Building a better nation through quality education”**.

JAMUI POLYTECHNIC JAMUI is not just a college but is a FAMILY in which the educational community, the management, staff, students and parents work whole heartedly to foster qualitative and quantitative endeavor. The entire atmosphere of **JAMUI POLYTECHNIC JAMUI** is permeated by this spirit, which promotes collaboration and cooperation leading to excellence.

Besides, possessing sound technical and entrepreneurial wisdom, our students will be equipped with the mental strength and requisite technical knowledge to face the pressures of global challenges. With steps being taken in the right direction, there is little doubt in my mind about achieving our self-set goals. The entire team at Jamui polytechnic is working together as a cohesive force.

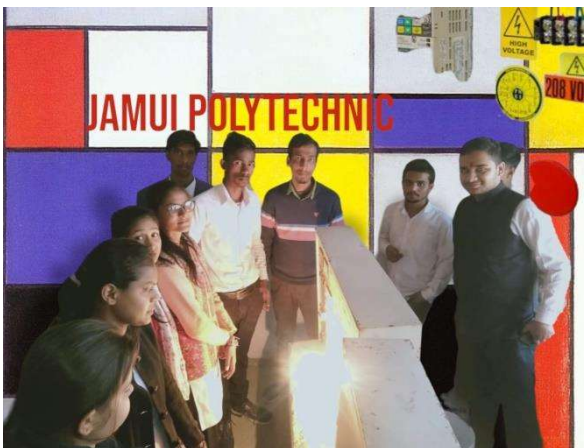

INTRODUCTION

JAMUI POLYTECHNIC JAMUI is located at station road khairma near kuil river of jamui, bihar 811307. The aim of the college is to provide industry and training relevant education to its student with well crafted practical training program for the student in the different semester of the course. the students moving to the final year are being trained in real workplace and factories construction, industries installation and rural development center etc.

INSTITUTE OBJECTIVES

- We transfer teenage power into technically competent & socially responsible human resource.
- To direct our service of education to the students ensuring their development by unfolding & activating their unique potential, creative ability & equipping them with technical & generic skills so that they would prove a talent pool to the industry & society at large.
- To produce technically competent, quality conscious engineers.
- To develop functionally suitable and conducive environment for students and staff for academic purpose.
- To develop the departments into the center of excellence.
- To implement Effective & efficient Teaching–Learning practices.
- To increase percentage of campus placements.
- To strengthen industry institute interaction.
